

# Mellott

## LOG AND LUMBER HANDLING EQUIPMENT

### 6' BANDSAW

### FEATURES

- Steel top wheel with replaceable hubs. Oversized bearings and shafts
- Round ways for the top guide with no lube bearings. No more adjusting gibes, oiling or replacing wear strips.
- Oversized jacks for raising the top wheel.
- Dual 6" diameter nitride support tubes per side, twice the competitions, ensures rigidity for less maintenance and for aligning the top wheel.
- Top wheel scraper tilts and moves up and down with the top wheel. It's always in the correct position. Our blades are straight so you can reverse them when one side wears out.
- Extra heavy frame and columns
- The Lower wheel is keyed and bolted. Everything references from the lower wheel
- Bolts to adjust level and bolt the machine down are on an exterior gusseted frame. Easy to access and use
- Easy access lower guide adjusting bolts, are adjusted from the front of the guide.

Top wheel scraper tilts and moves up and down with the top wheel.
