Horizontal FEED MODELS

Quad Series 50 x 86.HF

"OTHER SIZES
AVAILABLE"

Model 34 x 18.HF

Model 50 x 36.HF

"CUSTOMIZED TO
FIT YOUR SPECIFIC
NEEDS"

ARASMITH SALVAGER HOGS are unmatched in the wood waste reduction field utilizing a SINGLE PROCESS REDUCTION SYSTEM to reduce a full range of bio mass materials including stumps, whole trees, high density woods, pallets, brush, ties, demolition debris and other solid waste materials to the desired size. Infeed conveyors are available with screening and metal detection.

Patented screen insert cutters control material size, greatly accelerating screen output and reduces re-circulation resulting in a uniform product. The patented cutters reduce surge power requirements, and can be added or subtracted in the field to increase/decrease production requirements depending on power availability. The infeed guard and chain curtains enclose the cutting process.
