VIBRATING CONVEYOR

Mellott Manufacturing Co., Inc. has the capability to design and/or fabricate a wide variety of special conveyors and machines for the sawmill, pallet and woodworking industry.

Many applications can use the Mellott standard conveyors with minor modifications, and where practical, standard catalog items will be the most economical choice.

When necessary, the design can be handled by Mellott Manufacturing and conveyors fabricated in the Mellott shops. Fabrication of consultant designed equipment can also be accomplished at the factory.
