

Versatile By-Product Removal

The Pendu Bark Conveyor is the low-cost, low maintenance answer to versatile by-product removal. With a Pendu Bark Conveyor you can easily remove bark, sawdust, chips, edgings, trimmings, scrap, blocks and sweepings. Adaptable to a wide variety of configurations -- straight line or any combination of 45, 90, or 180 degree angles -- Pendu Bark Conveyors can be elevated up to 35 degrees to deposit material into trucks, hoppers or piles. Constructed of a heavy-duty steel trough and 2" steel angle paddles and available with optional return skirting and leg/brackets. The Pendu Bark Conveyor is driven by our exclusive 5/8" heat-treated oval link chain.
