

FW-16 FIREWOOD WRAPPER

The Go Fast Firewood Wrapper is the only industrial duty firewood wrapper available on the market today. This machine can wrap a bundle in under 12 seconds, making it the perfect solution for banding firewood bundles. The wrap is tensioned by a standard nut that ensures tight bundles and maximum wrap usage.

WHY GO FAST: Our firewood wrappers are simply better by design and unlike other manufacturers, we use high speed farm duty motors along with lubed bathed gear boxes. This allows us to get a higher amount of torque from our energy efficient 1/3HP motor. These components have proven themselves to outlast the light-duty, low speed motors that are commonly found on other firewood wrappers.

HEAVY DUTY: Go Fast produces only heavy duty equipment, and our Firewood Wrapper is no exception. These low-cost wrappers are built on solid tubular frames with large bearings and shaft on the wrapper arm.

"It was the only wrapper I could find that was such a simple design & it was affordable."
