Pallet Stacker Model-H

“SIMPLE, STURDY, RELIABLE”

Make perfect stacks of pallets ready to ship. The **Go Fast Pallet Stacker** is accurate and easy to operate. A simple chain infeed system allows the operator quickly insert the pallets with minimal effort. The air powered lift station ensures that your pallets lift smoothly and stack straight.

Benefits of a **Go Fast Pallet Stacker**:

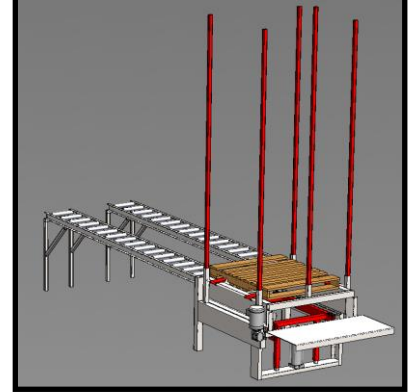

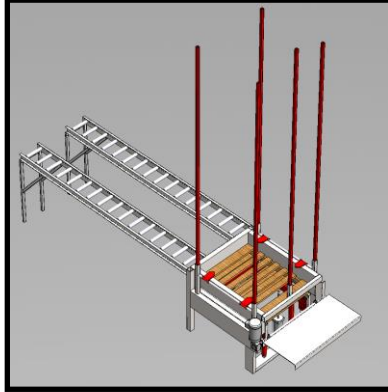

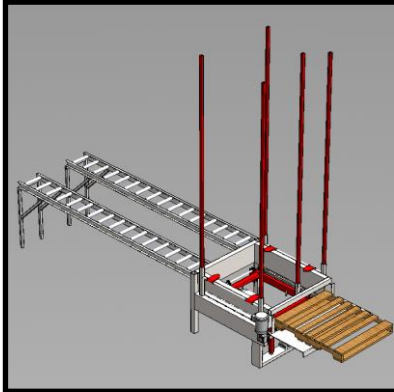

- Low cost of operation
- Available with multiple pallet bays
- Fully automated machine
- Low maintenance
- Multiple power options (220V, 440V)
- Completely prewired with start/ stop station
- Adjustable count setting
- Powered in-feed chain
- Powered out-feed chain

“Model-H” Pallet Stacker

The Model H pallet stacker features air and electric operation in a fixed 48” x 40” design. These machines offer a smaller footprint than many other available pallet stackers. They are available with single or multiple pallet stacking bays.

Standard features are fully automatic stacking operation, live in-feed chain rails, programmable counters for stack quantities, automatic stack eject, chain powered out-feed, and a heavy duty air lift station stacks the pallets.

Optional features are: PLC control, touch panel operator interface, remote control consoles, sheet steel perimeter walls, automatic infeed station, and out-feed rollers.

Pricing

Single Bay: \$9799
Double Bay: \$18999
Triple Bay: \$27599
